Terecel6034 A328s125A

User Manual V1.0

Specifications

Operating voltage: DC 2–8S (maximum 33V)

Continuous current: 125A

Maximum peak current: 145A

Firmware: BL32 / AM32 / custom closed-source firmware (contact customer service for your required firmware)

Current telemetry: supported

TVS surge protection: supported

BEC output: 5.5V / 7.4V, 10A

Protocols: Dshot150 / 300 / 600 / PWM

Applications

Suitable for drones, RC cars, RC boats and other models. Compatibility depends on the product model and specifications.

Product Dimensions

Bare-board weight: 73.9g

Dimensions: 34mm × 60mm

Connections

S: Throttle signal input

+: BEC output

−: Signal GND

Breakout pad interface

T: Serial transmit

R: Serial receive

A: Analog signal input
